

Cellebrite Federal Solutions, Inc. (CFSI) Achieves U.S. Department of War's Advanced Cybersecurity Standard, Reinforcing Commitment to Secure Federal Operations

September 1, 2026 at 8:30 AM EDT

TYSONS CORNER, Va., Sept. 1, 2026 /PRNewswire/ -- Cellebrite (Nasdaq: CLBT), a global leader in AI-powered Digital Investigative and Intelligence solutions for the public and private sectors, today announced its subsidiary, [Cellebrite Federal Solutions, Inc. \(CFSI\)](#), achieved the advanced Cybersecurity Maturity Model Certification (CMMC) Level 2 accreditation, an independent assessment conducted by a Certified Third-Party Assessment Organization (C3PAO).

CMMC Level 2 is an advanced cybersecurity tier under the Department of War (DoW) framework, established for contractors that handle DoW Controlled Unclassified Information (CUI). Meeting the CMMC Level 2 standard encompasses both the necessary technical safeguards and the policies, procedures, documentation and demonstrable operational maturity as verified by an independent third-party assessor. CFSI earned the certification by implementing and documenting 110 security practices across 14 control families, including access control, incident response, risk management, system and communications protection and auditing and accountability.

"Achieving CMMC Level 2 certification is a significant milestone for CFSI and another clear signal to our federal customers and partners that the protection of their most sensitive information is paramount," said Philip O'Reilly, senior vice president, chief operating officer and head of federal strategy for Cellebrite Federal Solutions. "This independent, third-party validation — alongside our recent FedRAMP High authorization — reflects our ongoing commitment to conducting business with the federal government in a trusted, secure and responsible manner. As the Department of War moves the entire industry toward mandatory third-party assessment, CFSI is proud to be ahead of the curve, putting us in the top 3% of organizations that have met the standard."

CMMC Level 2 has shifted from being a self-attested standard to a mandatory, third-party assessed requirement across the DoW supply chain. CFSI's early certification removes a barrier to entry to provide services to federal agencies. The certification builds on CFSI's continued momentum with federal customers, including this year's FedRAMP High Authorization achieved by Cellebrite Government Cloud. Together, these milestones reinforce CFSI's standing as a trusted, security-first partner to help federal agencies achieve their missions.

About Cellebrite Federal Solutions

Cellebrite Federal Solutions, Inc. (CFSI) is a U.S.-based, FOCI-mitigated subsidiary of Cellebrite DI Ltd. established to serve U.S. justice, defense, intelligence and federal civilian agencies dedicated to supporting federal government customers with secure, mission-ready digital intelligence and investigative solutions. Headquartered in Tysons Corner, Virginia, CFSI combines Cellebrite's global technology portfolio with deep federal domain expertise to support the missions of the United States government.

About Cellebrite
