Non-GAAP Financial Information and Key Performance Indicators

This press release includes non-GAAP financial measures. Cellebrite believes that the use of non-GAAP net income, non-GAAP operating income and Adjusted EBITDA is helpful to investors. These measures, which the Company refers to as our non-GAAP financial measures, are not prepared in accordance with GAAP.

The Company believes that the non-GAAP financial measures provide a more meaningful comparison of its operational performance from period to period and offers investors and management greater visibility to the underlying performance of its business. Mainly:

- Share-based compensation expenses utilize varying available valuation methodologies, subjective assumptions and a variety of equity instruments that can impact a company's non-cash expenses;
- Acquired intangible assets are valued at the time of acquisition and are amortized over an estimated useful life after the
 acquisition, and acquisition-related expenses are unrelated to current operations and neither are comparable to the prior
 period nor predictive of future results;
- To the extent that the above adjustments have an effect on tax (income) expense, such an effect is excluded in the non-GAAP adjustment to net income;
- Tax (income) expense, and depreciation and amortization expense vary for many reasons that are often unrelated to our underlying performance and make period-to-period comparisons more challenging; and
- Financial instruments are remeasured according to GAAP and vary for many reasons that are often unrelated to the company's current operations and affect financial income.

Each of our non-GAAP financial measures is an important tool for financial and operational decision making and for evaluating our own operating results over different periods of time. The non-GAAP financial measures do not represent our financial performance under U.S. GAAP and should not be considered as alternatives to operating income or net income or any other performance measures derived in accordance with GAAP. Non-GAAP financial measures may not provide information that is directly comparable to that provided by other companies in our industry, as other companies in our industry may calculate non-GAAP financial results differently, particularly related to non-recurring, unusual items. In addition, there are limitations in using non-GAAP financial measures because the non-GAAP financial measures are not prepared in accordance with GAAP, and exclude expenses that may have a material impact on our reported financial results. Further, share-based compensation expense has been, and will continue to be for the foreseeable future, significant recurring expenses in our business and an important part of the compensation provided to our employees. In addition, the amortization of intangible assets is expected recurring expense over the estimated useful life of the underlying intangible asset and acquisition-related expenses will be incurred to the extent acquisitions are made in the future. Furthermore, foreign exchange rates may fluctuate from one period to another, and the Company does not estimate movements in foreign currencies.

Annual recurring revenue ("ARR") is defined as the annualized value of active term-based subscription license contracts and maintenance contracts related to perpetual licenses in effect at the end of that period. Term-based license contracts and maintenance contracts for perpetual licenses are annualized by multiplying the revenue of the last month of the period by 12. The annualized value of contracts is a legal and contractual determination made by assessing the contractual terms with our customers. The annualized value of maintenance contracts is not determined by reference to historical revenue, deferred revenue or any other GAAP financial measure over any period. ARR is not a forecast of future revenues, which can be

impacted by contract start and end dates and renewal rates.

Dollar-based net retention rate ("NRR") is calculated by dividing customer recurring revenue by base revenue. We define base revenue as recurring revenue we recognized from all customers with a valid license at the last quarter of the previous year period, during the four quarters ended one year prior to the date of measurement. We define our customer revenue as the recurring revenue we recognized during the four quarters ended on the date of measurement from the same customer base included in our measure of base revenue, including recurring revenue resulting from additional sales to those customers.
