- On September 15, 2024, Cellebrite announced Pathfinder in the Cloud with Amazon Web Services (AWS), allowing customers to access Cellebrite's industry-leading investigative analytics solution, Pathfinder, through the secure Amazon Virtual Private Cloud (VPC). Pathfinder in the Cloud with AWS, part of Cellebrite's Case-to-Closure (C2C) platform, helps agencies of all sizes eliminate both the need to purchase and maintain physical servers as well as the common reliance on dedicated server rooms and sensitive compartmented information facility (SCIF) secure rooms. With this update, customers can now quickly scale storage and resources based on demand, while preserving resources as they only pay for what is needed.
- On September 24, 2024, Cellebrite announced that it received a patent for Remote Mobile Collection, which equips corporate investigators with immediate, targeted remote data collection saving them time and money. In today's hybrid work environment, Cellebrite's SaaS platforms Endpoint Mobile Now and Endpoint Inspector leverage this newly patented technology to deliver high value, supporting rapid data collection and offer greater convenience to the device's consenting owner, who can keep their devices during collection rather than returning them to a corporate office.

• On October 29, 2024, Cellebrite announced that its inaugural Case-to-Closure (C2C) User Summit, the premier event for digital investigations being held from March 31 to April 3, 2025, in Washington, D.C., will feature Tim Tebow as the keynote speaker. Tim Tebow is a two-time national football champion, Heisman Trophy winner, first-round NFL draft pick and a former professional baseball player who is also known for his extensive advocacy work to protect children through his namesake foundation. At the C2C User Summit, Tim Tebow will address his foundation's global fight against human trafficking, complementing Cellebrite's Operation Find Them All (OFTA) initiative, a landmark commitment to accelerating investigations of online crimes against children.

Capital Markets

- Cellebrite's efforts to drive value creation for shareholders underpinned three major milestones:
 - On September 16, 2024, Cellebrite disclosed that 5.0 million Price Adjustment Shares will be issued and 3.0 million Restricted Sponsored Shares vested after the dollar volume-weighted average price of the Company's ordinary shares was greater than or equal to \$15.00 per share

- On September 18, 2024, Cellebrite announced the results of the completed redemption of all
 of its outstanding Public and Private Warrants. Nearly all of the 20.0 million Public Warrants
 and 100% of the 9.7 million Private Warrants outstanding of August 15, 2024 were exercised
 on a cashless basis in exchange for an aggregate of approximately 10.1 million Ordinary Shares.
- On November 4, 2024, Cellebrite disclosed that 5.0 million Price Adjustment Shares will be issued after the dollar volume-weighted average price of the Company's ordinary shares was greater than or equal to \$17.50 per share for the 20th trading day within a 30 trading-day period. This is the third triggering event to occur, leaving 1.5 million Restricted Stock Shares that will vest when the dollar volume-weighted average price of the Company's ordinary shares is greater than or equal to \$30.00 per share for 20 trading days within a 30 trading-day period.

Non-GAAP Financial Information and Key Performance Indicators

This press release includes non-GAAP financial measures. Cellebrite believes that the use of non-GAAP cost of revenue, non-GAAP gross profit, non-GAAP operating expenses, non-GAAP operating income, non-GAAP net income, non-GAAP EPS and Adjusted EBITDA is helpful to investors. These measures, which the Company refers to as our non-GAAP financial measures, are not prepared in accordance with GAAP.

The Company believes that the non-GAAP financial measures provide a more meaningful comparison of its operational performance from period to period, and offer investors and management greater visibility to the underlying performance of its business. Mainly:

- Share-based compensation expenses utilize varying available valuation methodologies, subjective assumptions and a variety of equity instruments that can impact a company's non-cash expenses;
- Acquired intangible assets are valued at the time of acquisition and are amortized over an estimated
 useful life after the acquisition, and acquisition-related expenses are unrelated to current operations
 and neither are comparable to the prior period nor predictive of future results;

- To the extent that the above adjustments have an effect on tax (income) expense, such an effect is excluded in the non-GAAP adjustment to net income;
- Tax expense, depreciation and amortization expense vary for many reasons that are often unrelated to our underlying performance and make period-to-period comparisons more challenging; and
- Financial instruments are remeasured according to GAAP and vary for many reasons that are often unrelated to the Company's current operations and affect financial income.

Each of our non-GAAP financial measures is an important tool for financial and operational decision making and for evaluating our own operating results over different periods of time. The non-GAAP financial measures do not represent our financial performance under U.S. GAAP and should not be considered as alternatives to operating income or net income or any other performance measures derived in accordance with GAAP. Non-GAAP measures should not be considered in isolated from, or as an alternative to, financial measures determined in accordance with GAAP. Non-GAAP financial measures may not provide information that is directly comparable to that provided by other companies in our industry, as other companies in our industry may calculate non-GAAP financial results differently, particularly related to non-recurring, unusual items. In addition, there are limitations in using non-GAAP financial measures because the non-GAAP financial measures are not prepared in accordance with GAAP, and exclude expenses that may have a material impact on our reported financial results. Further, share-based compensation expense has been, and will continue to be for the foreseeable future, significant recurring expenses in our business and an important part of the compensation provided to our employees. In addition, the amortization of intangible assets is expected recurring expense over the estimated useful life of the underlying intangible asset and acquisition-related expenses will be incurred to the extent acquisitions are made in the future. Furthermore, foreign exchange rates may fluctuate from one period to another, and the Company does not estimate movements in foreign currencies.

A reconciliation of each of these non-GAAP financial measures to their most comparable GAAP measure is set forth in a table included at the end of this press release, which is also available on our website at https://investors.cellebrite.com.

In regard to forward-looking non-GAAP guidance, we are not able to reconcile the forward-looking Adjusted EBITDA measure to the closest corresponding GAAP measure without unreasonable efforts because we are unable to predict the ultimate outcome of certain significant items including, but not limited to, fair value movements, share-based payments for future awards, tax expense, depreciation and amortization expense, and certain financing and tax items.

Key Performance Indicators

This press release also includes key performance indicators, including annual recurring revenue and dollar-based retention rate.

Annual recurring revenue ("ARR") is defined as the annualized value of active term-based subscription license contracts and maintenance contracts related to perpetual licenses in effect at the end of that period. Subscription license contracts and maintenance contracts for perpetual licenses are annualized by

multiplying the revenue of the last month of the period by 12. The annualized value of contracts is a legal and contractual determination made by assessing the contractual terms with our customers. The annualized value of maintenance contracts is not determined by reference to historical revenue, deferred revenue or any other GAAP financial measure over any period. ARR is not a forecast of future revenues, which can be impacted by contract start and end dates and renewal rates.

Dollar-based net retention rate ("NRR") is calculated by dividing customer recurring revenue by base revenue. We define base revenue as recurring revenue we recognized from all customers with a valid license at the last quarter of the previous year period, during the four quarters ended one year prior to the date of measurement. We define our customer revenue as the recurring revenue we recognized during the four quarters ended on the date of measurement from the same customer base included in our measure of base revenue, including recurring revenue resulting from additional sales to those customers.
